

LIBRARY SERVICES

Librarians and support staff are available at each campus library to assist you with finding information, including assistance with citation formats (APA, MLA), and using computers or mobile devices to complete your class assignments.

The libraries provide a variety of books, e-books, online articles, and streaming videos to support course-related research and other learning needs. You may check out materials at any campus library with a library card. You may also request materials from other libraries through interlibrary loan. Currently enrolled students may access online resources using their network logon information.

Computers and Internet access are available in all college libraries and are available to all students. Microsoft Office as well as a variety of software programs and web resources supporting the college curriculum are accessible from library computers.

Subject guides, course guides, and tutorials are available on the libraries' website. Get research help on- and off- campus through our virtual chat reference service. For additional information, including hours of operation, visit www.lssc.edu/library (<https://libguides.lssc.edu/homepage/>) or call:
